I'm a full-stack web developer with hands-on experience building everything from small CMS sites to large-scale, high-traffic platforms. I enjoy tackling tough problems and finding clean, efficient solutions—whether that means refactoring old code or building something new from scratch. I pick up new tools quickly and like to keep things pragmatic. I care about shipping solid code, keeping things maintainable, and working with people who don't take themselves too seriously.

Technical skills

- **Languages**: TypeScript, JavaScript, PHP, Java, Python
- **Front-end**: React, Vue, Backbone, Next.js, SASS/SCSS, Emotion, Styled Components, Redux
- **Back-end**: Express, Laravel, Symfony, Spring Boot, Django, GraphQL, REST, SOAP, gRPC
- **CMS & E-commerce**: WordPress, WooCommerce, OpenCart
- **DevOps & Cloud**: AWS, Google Cloud, Heroku, DigitalOcean, Docker, Terraform, GitHub Actions, GitLab CI/CD
- **Databases**: PostgreSQL, MariaDB, MySQL, SQLite, MongoDB, Redis
- **Other Tools**: Elasticsearch, Redis queues, SMPP, monitoring/alerting setups

Experience

Rdcom, Italy, Remote July 2024 - Present
Senior Software Engineer, Full Stack

- Took over a legacy SMS microservice setup—cleaned up the code, broke things into manageable services, and helped reduce downtime significantly.
- Built a Vue + TypeScript admin panel that made it easier for support staff to do their jobs.
- Wrote APIs for messaging and diagnostics that played nicely with the old system without breaking anything.
- Worked closely with DevOps on containerization and CI/CD improvements.
- Added performance monitoring that actually helped us fix issues *before* customers noticed them.

Safara Travel, Inc., California, Remote November 2021 - June 2024

Senior Software Engineer, Full Stack

- Led front-end dev on a React booking platform—kept performance smooth and the UX snappy.
- Built both REST and GraphQL APIs to speed up data handling and simplify frontend integration.
- Handled AWS setup and infrastructure changes using Terraform—cut down a lot of manual config.
- Improved CI/CD workflows with GitHub Actions, catching bugs earlier in the pipeline.
- Maintained internal tools used by the business team to track data and handle operations.

XanPool, *Singapore,* Remote February 2020 - October 2021

Web Developer

- Developed a cross-platform payment widget supporting crypto and fiat—easy to embed, secure, and customizable.
- Built a real-time dashboard for partners with transaction tracking and controls.
- Created multiple e-commerce plugins from scratch (WordPress, WooCommerce, OpenCart), fully tested and production-ready.

QSOFT June 2019 - January 2020

Web Developer

- Maintained a busy e-commerce site—fixed bugs fast and helped optimize performance under heavy load.
- Pushed out new features on a tight schedule while keeping everything stable.
